Farm to Early Care and Education

Welcome (Seasonal Narrative & Casual Hello)

Your name:

Priority:

Title:

Copy: April offers lots of excuses to celebrate. It is National Garden Month for one. It also boasts Earth Day, Arbor Day, and Environmental Education Week. It is not too late to connect the children in your life to the great outdoors. Spend some time digging in the garden and imagine the growers in your community doing the same. Explore a fruit tree in bloom and map the nearby orchards for educational or procurement opportunities down the line. Watch green return to your school yard in the form of plush grass and your school cafeteria as fresh spinach

leaves. Then continue the celebration by checking out the new resources, professional development opportunities, and more below. Early childhood professionals will notice the new Farm to Early Care and Education header. Resources throughout apply to the early care and education setting, but if you have limited time, this new section will keep you in the know about local and national farm to early care and education activities. Happy April, farm to school champions!

Copy: **Case Study: Shrinking the Carbon and Water Footprint of School Food - A Recipe for Combatting Climate Change**

As schools across the nation grapple with how to feed kids healthier, more sustainable food on tight budgets, an inspiring story from Oakland Unified School District provides a roadmap for change. Friends of the Earth's new case study shows how the district was able to significantly reduce its carbon and water footprint by replacing a share of its meat, poultry and cheese purchases with plant-based proteins. These actions also saved the district money and improved students' access to healthful food. [Read the case study here.](#)

Copy: **2. Recording Available: Farm to Summer: How Regional Offices and State Agencies Support Farm to Summer**

Increasingly, Summer Meal sponsors are embracing the Farm to Summer movement by serving fresh, local foods and offering engaging activities, and Regional and State-level staff play a unique role in supporting these efforts. This USDA webinar provides an overview of farm to summer activities, resources, and a snapshot of how Regional offices and State agencies have encouraged sponsors to adopt farm to summer principles. From MAP addendums to partner meetings, discover how your Regional and State colleagues support “bringing the farm” to Summer Meal Programs. [Watch the recording here.](#)

Title: **Local Food Pricing: Survey for Food Service**

Copy: This survey is for food purchasers to share information on their willingness to pay for locally grown, source-identified foods. Please encourage school, hospital, and college foodservice buyers to take this 10-minute survey to help the Wisconsin Farm to Institution Project work with broadline and produce distributors on carrying more Wisconsin-grown foods. Thank you for your feedback! [Take the survey here.](#)

Title: **Webinar: School Garden Program Sustainability and Finances**

Copy: *April 25, 1pm PST.* School gardens are tremendously popular and valuable resources, but these programs often face questions about if they can continue year-to-year. In this webinar, the National School Garden Network will discuss dedicated garden program staffing, community engagement, and other factors that lead to programmatic sustainability. You'll also learn from successful initiatives to secure corporate sponsorships; community partnerships; legislation; and school or district-level investments that lead to financial sustainability. [Learn more and register here.](#)

Title: [Wisconsin farm to school efforts could expand amid state uncertainty](#)

Copy: Despite concerns Wisconsin's farm to school leadership could be cut in the next state budget, local proponents are carrying on with expanded outreach of local, healthy food selections. "What's happening in the classrooms and cafes is not going away. We know we have passionate schools and producers committed to farm to school," said Beth Hanna, farm to school director for Community GroundWorks and NFSN Wisconsin Core Partner. "What is at stake is the big picture planning ... needed to continue at significant levels or to scale up." Read the whole article [here](#). (Source: [Green Bay Press-Gazette](#))

Title: [Farm, school groups want to see Farm to School program continue](#)

Copy: Farmers and educators are joining together to support the state's Farm

to School program, which would be eliminated under Gov. Scott Walker's proposed 2017-19 state budget. Nineteen groups signed on to a letter to members of the legislature's Joint Finance Committee, urging them to save the program. The Farm to School program connects Wisconsin growers and producers to schools, daycares, hospitals, universities and other institutions. "Farm to School is an important investment in our farm economy and the next generation," said Wisconsin Farmers Union President Darin Von Ruden."

Title: Pop-up Market at ECE Centers

Copy: By: Kara LeClair, RDN and Kenna Ho, MS

As toddlers stir from their naps and parents shuffle in and out of the Burke County Early Head Start every afternoon, hellos and pleasantries are exchanged between staff and parents. The scene usually ends in a sleepy-eyed child walking out the doors with their caregiver, heading on their way until the next morning. However on Wednesdays at the beginning of this school year, the day ended just a little bit differently, thanks to an after-school farmer's market pilot funded by a [2016 National Farm to School Network Innovation Award](#) granted to [Georgia Organics](#).
